

Matthew Bettencourt

Research • Data Analysis • Community Insights

A summary of my work at Storycraft Lab

About Me

MA Sociology, University of Kansas

Research and analytics professional with experience transforming community, survey, and audience data into actionable insights for stakeholders.

Focus Areas:

- Community research
- Survey analytics
- Audience segmentation
- Python data analysis
- AI-assisted insight systems

Analytics:

- Python
- Pandas
- Excel

Research:

- Survey Design
- Qualitative Analysis
- Audience Research

Communication:

- Data Visualization
- Insight Development
- Stakeholder Reporting

Communities are telling us what they need.

We just need a system to sense it and hear it.

What if we turned community moderation & management into *community intelligence*?

STORYCRAFT LAB

COMMUNITY SENSING

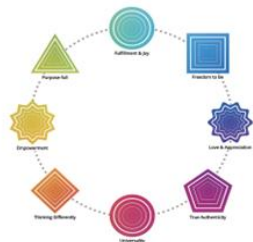

The Ask

Transform community conversations into actionable insights.

What I Did

- Researched community intelligence methodologies.
- Identified recurring themes and engagement patterns.
- Helped translate qualitative conversations into structured insights and recommendations.

How Community Sensing *works*.

1 Capture Signals

- Language, keywords, tone
- Engagement themes, patterns

2 Map Meaning

- Signals mapped to Wheel of Belonging pathways and touchpoints
- Identify emotional & psychological drivers

3 Generate Insight

- Pattern recognition over time
- Clear view of community needs

What is in the Toolkit?

A set of tools leaders can use across teams and engagements—supporting ongoing reflection, insight, and activation throughout the year and at key touchpoints.

1

Training sessions
introducing the methodology and tools

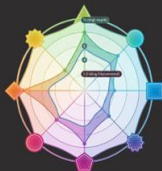

2

The Field Guide
providing guidance on the work

3

Quarterly pulse check quiz surfacing team patterns

4

Dashboard and Agent MAIA
interpreting insights for team leaders

5

Curated engagement sprints and group activities activating team practices

LEADERSHIP TOOLKIT & QUARTERLY PULSE CHECK

The Ask

Measure and improve team belonging through recurring feedback and reporting.

What I Did

- Developed pulse-check concepts.
- Connected assessments, dashboards, and leader insights.
- Turned team feedback into actionable recommendations.

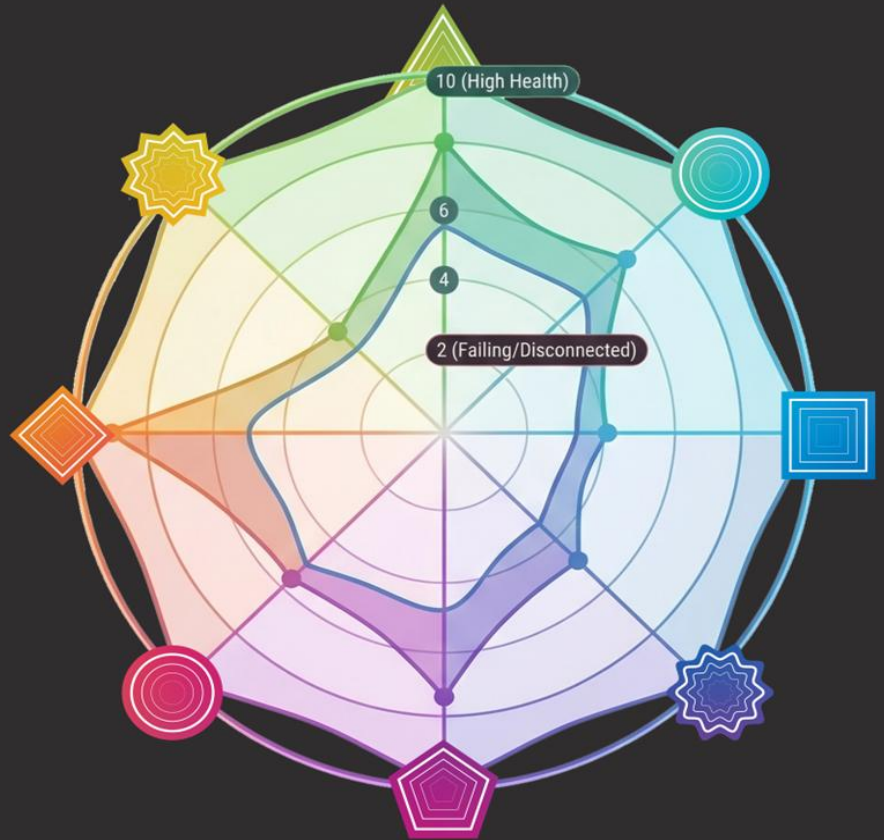

Quarterly Pulse Check Quiz

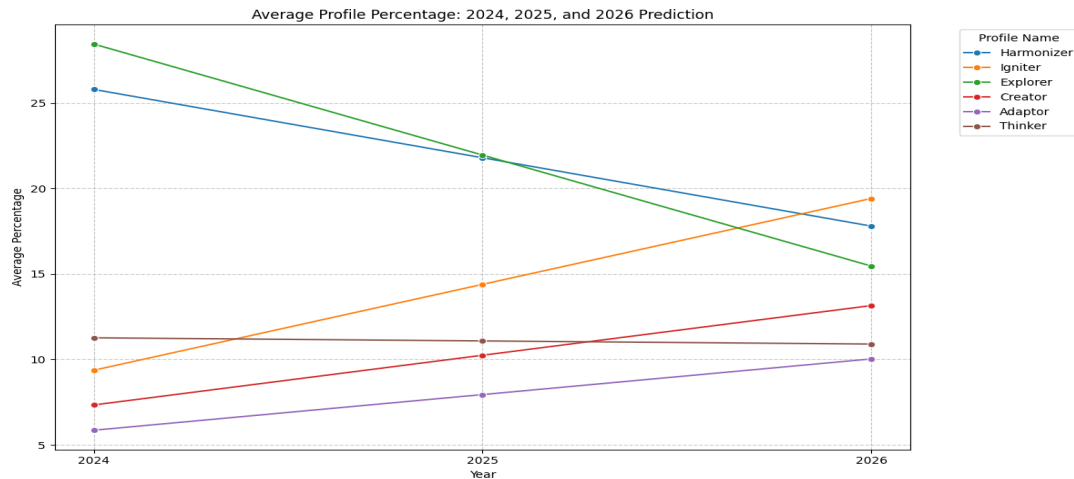

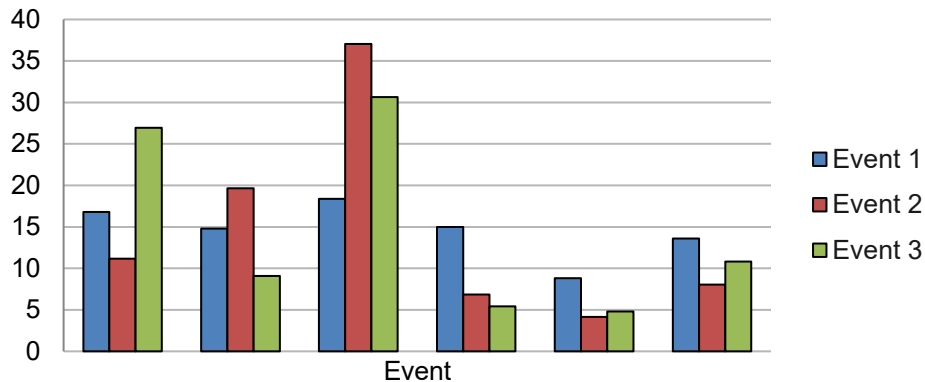

Team Leader Insights

Team leaders receive an aggregated view of the group's responses, visualized through the dashboard, revealing the 'state of belonging' for the group and recommendations. Responses are anonymous, ensuring the focus stays on team dynamics rather than individuals.

This view highlights:

- Patterns across the team
- Areas where the group feels aligned
- Pathways where additional attention may be helpful
- Recommended activities and session formats to explore

END OF YEAR ANALYSIS

The Ask

Analyze 2024–2025 event data to identify trends and inform 2026 recommendations.

What I Did

- Analyzed survey data using Python.
- Standardized and transformed event datasets.
- Identified audience segments and behavioral patterns.
- Produced data-driven insights and recommendations.

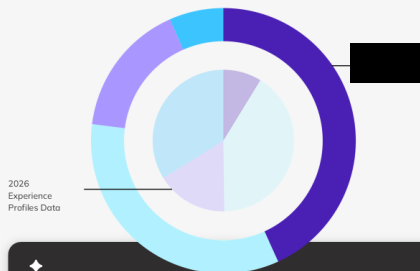

1. What most motivates you in your work?

43.21% Building solutions to complex problems

33.80% Empowering teams to perform their best

16.38% Exploring new tools and technologies to scale our impact

6.62% Sparking momentum to get the ball rolling

Compared to our baseline data, significantly more attendees want to build solutions to complex problems (+34.5%) while far fewer are drawn to sparking momentum to get the ball rolling (-27.2%).

13. How do you add value to your team?

26.12% Teamwork

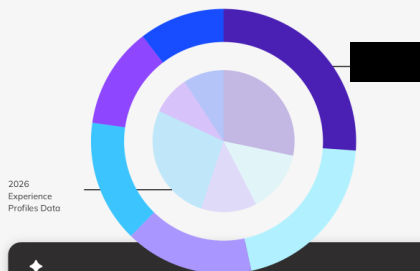

14.93% Decisiveness

20.52% Analysis

12.31% Flexibility

15.67% Foresight

10.45% Originality

Compared to our baseline data, significantly more attendees add value to their team through analysis (+7.8%) while far fewer rely on originality (-16.4%).

RECURRING REPORTING & INSIGHT DEVELOPMENT

The Ask

Turn audience data into actionable insights.

What I Did

- Analyzed multi-event survey datasets.
- Identified trends and audience preferences.
- Compared audiences against baseline data.
- Developed recommendations for future events.
